A PATRIARCH HAS DIED.—The experienced and the venerable JOHN QUINCY ADAMS is no more! At a ripe old age, full of honors, respects, and beloved by all parties and classes, he has been gathered to his fathers, as did, like the Earl of Chatham, breathed his last on the theatre of many of his greatest intellectual exploits. The era is sincerely mourning when such men die, for it is like the expiring of a great light that has long shone around us, and illuminated our darkened pathway.

Mr. Adams was born on the 11th of July, 1767, and was the son of John Adams, the second President of the United States, who was the fourth in descent from Henry Adams, who, in 1630, fled from Devonshire, England, to escape the persecutions of the Archbishop Laud, the ecclesiastical adviser of Charles I. A maternal ancestor was one of the pilgrim fathers who came passenger in the *May Flower*.

At the age of eleven years, young Adams accompanied his father to France, and received the daily care and instructions of Doctor Franklin and other distinguished men there. He went to school a short time in Paris; and on the removal of his father to Holland, he was

sent, first to the public school in Amsterdam, and afterwards to the city university of Leyden. In 1781, then only fourteen years of age, he accompanied Mr. Francis Dana to Russia. Mr. Dana had been appointed ambassador to that Court, and young Adams went as his private secretary. In the winter of 1782-3, he travelled alone through Sweden and Denmark, thence to Hamburg and Bremen, and reached the Hague in safety, where his father was then minister for the United States. When, in 1785, his father was appointed Minister to England, he asked leave to return home and complete his education, for hitherto his book-studies had been constantly interrupted. He entered Harvard University, where he graduated in July 1787.

At the age of twenty he commenced the study of law with Theophilus Parsons, of Newburyport, afterwards the distinguished Chief Justice of Massachusetts; while a student there, Parsons was chosen to address Washington on the occasion of his visit to that place,—he asked each of his students to write an address, which they did, and that of Adams was chosen and delivered by Parsons. After completing his course of study, he removed to Boston and commenced practice, employing his leisure in writing upon political subjects. His essays, showing it to be the duty of the United States to remain neutral in regard to the existing quarrel between France and England, were read with admiration, and effectively aided in resisting the efforts of Genet to involve the United States in the controversy. They gave him a reputation as a writer and statesman, and his talents were appreciated by Washington. Mr. Jefferson, who formed an acquaintance with him in Paris, recommended Washington to introduce him into the public service. In May, 1794, he was appointed resident minister to the Netherlands. Towards the close of his administration, Washington appointed him Minister to Portugal; but while on his way to Lisbon, he received a new commission from his father, who was then President, which changed his destination to Berlin, where he effected a commercial treaty with Prussia. In May, 1797, he was married to Louisa Catherine, daughter of Joshua Johnson, of Maryland, at that time residing in London.

He returned to America in 1801, and in 1802 he was elected to the Senate of Massachusetts. In 1803, he was elected to a seat in the United States Senate, where he uniformly supported the measures of Mr. Jefferson. For this support the Massachusetts Legislature censured him, and in 1803 he resigned his seat. In 1809, Mr.

Madison appointed him Minister plenipotentiary to the court of the emperor of Russia, and he was the first who occupied that station. The emperor Alexander admitted him to a degree of intimacy quite extraordinary; and when war between the United States and Great Britain was declared, in 1812, he offered his mediation, but it was rejected by the latter government. In 1814, Mr. Adams was placed at the head of the American commissioners that met the English commission at Ghent, to negotiate for peace. In connection with Henry Clay and Albert Gallatin, a treaty of commerce was negotiated with Great Britain, on the basis of which our present commercial relations with that country are founded.

In 1815, Mr. Adams was appointed Minister to the court of St. James, which post he occupied until 1817, when President Monroe offered him a seat in his cabinet, as Secretary of State. He accepted the office, and remained therein during the eight years' administration of Monroe. In February, 1811, he was appointed a Justice of the Supreme Court of the United States, but never accepted of the honor.

His indefatigable industry, and clear, statesmanlike views, rendered him one of the most useful men in the country. We shall conclude our remarks on Mr. Adams to-morrow.

On this evening the noble steam-palace Bay State is expected to resume her trips between New York and Fall River, in connection with the Governor. The Bay State has been newly painted, and every thing about her put in complete order. We shall hereafter receive our New York mail direct from New York every morning.

This evening, if pleasant, Protection Engine Company No. 5, will have a grand torch light procession, marching through some of our principal streets, headed by music, to Hertson's Hotel in Pelham street, when they will set down to a sumptuous repast.

On the death of Mr. Adams was announced in the Senate and House, both rooms were crowded to their utmost capacity, and eloquent, and feeling eulogies were pronounced by several members, after which the customary resolutions were passed.

Mr. Adams' seat, in the House, was hung with draped.

The Rev. Dr. Choules will deliver a sermon next Sunday evening, at the North Baptist Church, on the Life and Character of John Quincy Adams. We know of no man more competent to do ample justice to the eminent qualities of the great statesman, than Dr. Choules, and we anticipate a crowded audience on the occasion.

The following is the inscription on the coffin of Mr. Adams:—

JOHN QUINCY ADAMS:

BORN

An inhabitant of Massachusetts.

July 11, 1767.

DIED

A citizen of the United States, in the Capitol, at Washington,

February 23, 1848.

Having served his country for half a century and enjoyed its highest honors.

Thirteen guns were fired at Fort Adams, in this harbor, yesterday morning, at 6 o'clock, followed by half hour guns during the day, until sun-set, when a national salute of twenty-nine guns was fired, to the memory of John Quincy Adams. The flag at the Fort was displayed at half-mast, during the day.

The flag at the Armory of the Artillery Company, was also at half-mast.

The House of Representatives appointed a committee of one from each State, to accompany the body of Mr. Adams to the place of interment.

Lake Erie is entirely free from ice, and the steamboats are making their regular trips. This is very uncommon, in the winter season.

All the public buildings, stores, &c., in Washington, were closed on Saturday last, and an immense concourse attended the funeral of Mr. Adams.

U. S. DEPUTY.—The House of Representatives has adopted a resolution, on motion of Mr. Murray, instructing the committee of ways and means to inquire into the expediency of requiring the Secretary of the Treasury to call for the repayment by the several states of the monies of the U. S. deposited with them for safe-keeping.

STATISTICS OF LOWELL.—There are now in this flourishing New England city, twelve manufacturing corporations, having an aggregate capital stock of \$12,110,000, and employing 12,620 hands, whose weekly wages, clear of board amount to \$36,446. There are two institutions for Savings—the Lowell and the City—where their operatives deposited during the year ending April 30, 1847, \$836,305; three Banks, having an aggregate capital of \$900,000; and a Mutual Insurance Company, which has been highly successful in its operations. The persons employed in the several manufacturing establishments have access to a library of 7000 volumes, belonging to the city. A hospital has also been established for the sick and disabled. The various factories produce weekly an aggregate of 1,920,000 yards of cotton and 27,831 of woolen fabrics, in which 638,000 pounds of the raw material are consumed.

The present population of Lowell, is 30,000. In 1828 it was only 3,534.

THE SUPPOSED MURDERER OF HELEN JEWETT.—A letter from Florida contains the following:—

Richard P. Robinson, of Helen Jewett memory, I am convinced in my own mind has chosen a fast resting place, here, in County West Florida. A young man bearing his name died there not long since. He kept a small drug store, and was very recluse in his habits, studiously avoiding all mention of home or friends. After his decease, his little stock of medicines was divided among the country people, as there was no claimant for them. I am satisfied from some letters which were left, that Mr. Robinson had sought to escape from the relentless persecutions of an uncharitable and unforgiving world, and that, buried here in the most humble obscurity, he was striving to live down the bitter past, by an even and exemplary life. The country people speak kindly of his virtues, and warmly cherish his memory. There is a bare possibility of my being mistaken, but the similitude seems too striking, both in the name and various incidents connected with the misfortunes of Robinson, which are alluded to in the letters, but with which I was familiar.

On the thousand wild turkeys were seen on a single roost on an island at the mouth of the Missouri, about the 1st of February.

A correspondent informs the N. O. Picayune that a Mr. George E. Thompson killed, on the 29th ult., on the banks of the Tunica, La., a wild turkey which weighed, when dressed, thirty three pounds and a quarter! besides twenty-one partridges, sixteen squirrels, seven rabbits, three wild ducks, four owls, two hawks, and thirty-two black-birds!

The maple sugar makers of Massachusetts began their work last week, with a fair prospect of securing a good crop of this delicious and valuable article. This is several weeks earlier than usual for the sugar season to open.

Eggs are selling in Cincinnati at five cents a dozen.

WONDERFUL FECUNDITY.—Haller says, that a single horse fly will, in one season produce 20,032,210 flies! No wonder flies are plenty.

NO MORE STEAMERS STARTING ON SUNDAY.—The Ocean Steam Navigation Company have determined that when hereafter the 20th day of the month falls on Sunday, their steamers shall sail on the 21st.

THE BLACKSTONE CHRONICLE is the name of a new paper which has just been established at Blackstone, by Oliver Johnson, formerly connected with the New York Tribune. It is to be published weekly, a family paper, neutral in politics.

ILLNESS OF GEN. TAYLOR.—A letter in the New Orleans Bulletin, dated Baton Rouge, La., Feb. 12, says:—

I am sorry to inform you that Gen. Taylor is laboring under slight indisposition. He has been too unwell to see his friends for the past two or three days; but I learn to day that his health is much improved. His complaint is neuralgia.

CONSTITUTION.—Why is a well edited and popular newspaper like a boiled lobster?

Do you give it up? Because it's certain to be read!

THE METHODIST EPISCOPAL CHURCH, SOUTH, are about to send out two missionaries to China, Rev. Messrs. Taylor and Jenkins. They are to sail early in April.

WASHINGTON, Feb. 25.—I hear that Capt. Sibley has arrived with dispatches from Gen. Wool, containing propositions from the authorities of Sonora, Chihuahua, Coahuila, New Leon and other Mexican provinces, to be annexed to this country.

THE HON. JOHN J. CRITTENDEN, U. S. Senator from Ky., has been nominated for Governor by the Whig Convention of that State.

CURIOS FACT.—A correspondent of one of the Cincinnati papers states that the Buena Vista battle field is still covered with bones, coats, pants, shoes, gun-powders, &c. And what is most singular of all is, that a few Mexicans who were left unburied are still on the field entire. Neither putrefaction nor the wolves prey upon them, but they are dried up like mummies.

ON A single hour the heart beats 3,600 times, discharges 7,200 ounces of blood which passes through the body 25 times. In 24 hours, the blood in the body circulates through the heart 6000 times.

THE Cincinnati Herald has found a cough candy so good that the most obstinate cold can be cured with it, by simply putting one of the wrappers in a stocking and tying it about the throat over night!

THE territory of British India covers an expanse of 128,000 square miles, and has a population verging to 134,000,000.—Its trade with the world amounts to £30,000,000 and its coast is deeply indented with harbors, measures 1,500 miles.

CAUTION.—The public are particularly cautioned against being imposed upon by persons that are selling preparations of Sarsaparilla which they pretend have the same qualities as Brown's Sarsaparilla and Tomato Bitters. Since these Bitters have been offered to the public, there have been no less than four different imitations got up by as many different individuals, and sold for the genuine. The good qualities of Brown's Extract of Sarsaparilla and Tomato, or Sarsaparilla and Tomato Bitters, is already known and appreciated by physicians and the public—particularly by those who have used them for Impurities of the Blood, bad Humors, Scrofulous Diseases, Bilious affections, Costiveness, loss of appetite, &c. &c. There has been no medicine sold that has given such general satisfaction. There can not be the least doubt but this compound is the best alterative now in use. We have abundant proof of that fact. There have been thousands of cases of impurities of the blood cured by this medicine. Some of them have been truly wonderful, where the patients have been given over as incurable. The above compound is not merely a common extract of the Spanish Sarsaparilla, but a very strong extract of the best Spanish Sarsaparilla, extracted by an entirely new apparatus, made expressly for the proprietor, and used by no other person in this country. This apparatus ensures the whole medical qualities of this most valuable root.

UNITED STATES HOTEL.
On Pearl, Fulton and Water sts., New York,
BY H. JOHNSON.

THIS is one of the largest and best kept Hotels in the city of New York. Board, \$150 per day. Its location is particularly convenient for business men, and Mr. Johnson, the popular and genteel landlord, makes the comfort of his guests a constant study.

ONE OF THE MOST IMPORTANT effects of the recent progress of Science is the alliance of Chemistry with Physiology. By which a new and unexpected light has been thrown upon the vital processes of animals. For this we are indebted chiefly to the German and French chemists. We have now a clear understanding of the different actions of aliments, persons, and remedial agents, and the long derided theory of the blood being the portion of the system upon which the latter should act, is now demonstrated truth. The great object, therefore, is to ascertain what remedy will act most directly upon the constituents of the blood when in the act of combat with disease, observation, and a cloud of witnesses establish the fact that SANDS' ARSATAVITOL, is at the very head of this class. Cancer, scrofula, scurvy, croup, pleurisy, leprosy, ringworm, mercurial diseases, suppuration of the glands, swellings of the joints, and all the diseases of the muscles and tissues, together with general debility of the system, yield to this untiring purifier of the blood—for the blood is the channel through which disease finds its way to the various organs of the body.

Prepared and sold by A. B. & D. SANDS, Druggists, 100 Fulton st., N. Y.

Sold also by Dr. R. R. Hazard and R. J. Taylor, for sale by J. Russell, Fall River, by C. Dyer, for sale by R. J. TAYLOR.

MADAME C. AMY.

This truly miraculous lady is still at the United States Hotel, displaying her mysterious and wonderful powers in developing human character, by the aid of improved modern science; bringing from oblivion the things of the past, and giving form and pressure to objects yet sleeping in the wide abyss of possibility.

COLD FEET are an evidence that the blood is encumbered with morbid humor, which not only render the circulation sluggish and unequal, but prevent a proper supply of the vital fluid to the extremities. Hence coldness of the hands and feet, accompanied with headache, giddiness, and many other unpleasant complaints.

Wright's India Vegetable Pills are one of the best preventives in the world against Cold Feet, because they not only cleanse the blood from those paroxysms which are the cause, but they impart an energy to the circulation which carries it with vigor to every part of the system.

BEWARE OF SCAM CHAMOMILE.—Remember that the original and only genuine Indian Vegetable Pills have the written signature of William Wright on the top label of each box.

The genuine are for sale by C. G. HAZARD,

WHITE Malaga Grapes, in fine order, just received and for sale at RIDER'S, Jan 29

China Tea Company Agency.

M. FREEBORN & CO.,
32, Broad-Street, Newport, R. I.

AGENTS FOR THE

China Tea Company.

THIS Establishment, the oldest and most extensive concern in New England, was originated in 1812, for the purpose of supplying the citizens with Tea, of every grade and quality. It has a peculiar life and abundant resources, undiminished by any other House existing, whatever may be their pretensions.

The following catalogue of Teas, at retail prices, are warranted sound,—like remarkable for extreme fragrant aroma, and extraordinary strength of flavor:

BLACK TEAS.

Souchong, per lb. Young Hyson, per lb.

Very good 50 32 Very fine sweet car-

Extra fine 40 30 Strong

Pekoe do very rich 50 " " 60

Powchong.

Good, full flavored 30 Silver leaf, rich flavor 90

Very superior 75 Golden crop 1 25

Ningyong.

Good 30 Hyson Skin.

Very good 40 Excellent quality 90

Oolong.

Very fine 55 Imperial.

Extra fine 75 Very fine and strong 75

Orange Pekoe 50 Very superior 1 00

Kiueh Yatchoh 55 Hyson.

Flower Pekoe 75 Plantation growth 90

English breakfast tea 60 Fine flavor, very 90

Howqua mixture 70 Finest description 1 00

A comparison of their Teas with those of higher prices, is respectfully solicited, and they flatter themselves that the superiority of their article will prove a certain means of continuing to their establishment the very flattering preference it has heretofore enjoyed.
